EDUCATION

EMSI Casablanca (École Marocaine des Sciences de l'Ingénieur)

Oct 2023 – Oct 2028 (expected)

State Engineering Degree (5-year program), Computer Science

Relevant coursework: Java OOP & Collections Framework, data structures in C, SQL Server / T-SQL, web development (PHP, Symfony, Django), system modeling (UML), algorithms, data structures course.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, C, PHP, SQL / T-SQL, HTML/CSS, C++ (foundations)

Frameworks & Web: Django, Django REST Framework, Flask, React, Symfony, Bootstrap 5, REST APIs

Databases: MySQL, SQL Server, SQLite

Security & Tools: JWT authentication, access control, AES-256 encryption, Git / GitHub, VS Code

Languages (spoken): Arabic (native), French (fluent), English (professional), Spanish (beginner)

EXPERIENCE

Software Development & Security Intern — SOREAD-2M (2M TV)

Jul 2026 · Casablanca

4-person team project: document management (GED) and collaborative intranet platform

- Built the accounts/users backend module with Python, Django REST Framework and SQLite, consumed by a React frontend I also contributed to.
 - Designed data models and REST APIs for user accounts, workspaces and access rights; implemented JWT authentication, CSV bulk user import and a password-reset endpoint.
 - Applied application-security and access-control best practices; tested, debugged and resolved technical incidents.
 - Worked with Git/GitHub in a collaborative workflow and presented the platform at the final project defense.
-

PROJECTS

Library Management System | Django, MySQL, Bootstrap 5, Chart.js, ReportLab

Apr – May 2026

- Full-stack web app with separate admin and member interfaces: loans, returns, reservations, and automatic fine calculation.
- Generated PDF reports and data exports, and integrated automatic email notifications (welcome, confirmation, overdue, fines).

SecureVault Pro | Python, CustomTkinter, Flask, SQLite

Mar – May 2026

- Built a password-analysis and protection tool using AES-256 encryption, with a CustomTkinter GUI and a Flask RESTful API for secure data access.

Hotel Prestige | PHP, Symfony

Dec 2025 – Jan 2026

- Developed a hotel management web application with room booking and client management.

Hotel Management App (Console) | C

Dec 2024 – Mar 2025

- Implemented a console hotel management system relying on data structures and file handling in C.

Your Library | HTML, CSS, JavaScript

Mar – May 2025

- Created a front-end library management interface with dynamic JavaScript interactions.
-
